ABOUT

Proactive **Technical Support Engineer** boasting **1-2 years** of handson experience in the technological domain. I bring to the table proficiency in **JavaScript, API integration**, and **troubleshooting** in web development environments. My skill set extends to **web analytics**, where I shine in deciphering and amplifying digital processes to **enhance user experiences** and drive operational efficiencies. Eager to pivot into a development role, I bring a reputation for **rapid learning**, potent communication, and a collaborative ethos that **enhances** team **dynamics** and **project** outcomes. With a steadfast commitment to technical excellence, I am poised to contribute effectively to web development teams and projects

EXPERTISE

- JavaScript, React JS, NodeJS
- RESTful API Integration
- Database Management
- Analytics & Reporting

WORK EXPERIENCE

Piwik PRO October 2022 - present

- Developed personalized tracking solutions utilizing JavaScript and JavaScript Tracking Client.
- Authored scripts with JS and API to fetch specified and data.
- Generated Docker images for debugging web applications across varied versioned environments..
- Employed Node.js in creating a lookup script to streamline the login process.
- Utilized Postman & Insomnia for debugging and enhancing API requests directed to our tracking API.
- Engineered an e-commerce site hosted on Netlify utilizing REACT, Firebase, Redux, with Piwik PRO tracking integration.
- Implemented AI solutions with proprietary data sets to conserve resources and tackle common issues.
- Assisted in creating technical documentation via Confluence to enhance the internal knowledge database, saving time for fellow coworkers.
- Creating data exports configuration for Azure Blob, AWS S3, Big Query, SSH (SFTP)
- Developed a Python application to simplify API requests and collect essential data.

SKILLS

Programming & Scripting: JavaScript | NodeJS | React | NextJS | RestAPI | ExpressJS | TypeScript | JEST | Mongoose | Redux | Python | Bash
